## **DETAILED ACTION**

## Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

It is noted that the Walker patent, applied in the previous rejection, adjusts the pressure in the conduit when the measured pressure *is greater* than the target pressure - consistent with the purpose of deflating the tire. Thus, the Walker reference, and the Prior Art in general, do not fairly teach or suggest the combination of steps claimed in the instantly claimed method for determining tire pressure - in particular the step of *providing a pulse of compressed fluid* to the conduit when the first fluid pressure *is less than said target pressure*.

## **Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William L Oen whose telephone number is 571-272-2186. The examiner can normally be reached on 10:30 am - 9:00 pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz can be reached on 571-272-2180. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
